DATA ITEM DESCRIPTION NUMBERING SYSTEM

1. DIDs Cleared and Listed Prior to 1 July 1985.

DIDs cleared and listed in the AMSDL prior to 1 July 1985 were assigned to a Functional Category as follows:

A—Administrative/Management
E—Engineering and Configuration Documentation
F—Financial
H—Human Factors
L—Logistics Support
M—Technical Publications
P—Procurement/Production
R—Related Design Requirements
S-System/Subsystem Analysis
T—Test
V—Provisioning

The single alpha character following "DI" represents the Functional Category. Following the alpha character is a four- or five-digit number. Revisions are indicated by an alpha character suffix, e.g., Dl-M-1514A. Upon revision of a DID on or after 1 July 1985, a new number will be assigned to each revised DID using the functional area assignments identified in Section B, per paragraph 2 below.

2. DIDs Cleared and Listed* on or after 1 July 1985

Beginning 1 July 1985, DIDs have been assigned identification numbers by the Chief, Plans and Police Division as follows: "DI," followed by a four-letter designator representing the fictional area assignment identified in Section B, followed by a five- digit number. Revisions are followed by an alpha character suffix. e.g., DI-MISC-80000A. Revisions are also assigned by the Chief, Plans and Policy Division.

* One-Time DIDs: Numbers for one-time DIDs shall be assigned by the data management focal points of the individual DoD Services and Agencies. These documents will not be listed in the AMSDL, nor will they be printed and maintained by DODSSP, PA. One time DID numbers are assigned as follows: "OT" followed by the last two digits of the current year "93", followed by a 5 digit number assigned to your Service or Agency, e.g., 0T-93-?5000.
